

MaCaPS Club House Facility Booking System

MaCaPS Club House Facility Booking System adopts the latest smart card technology to provide automation-booking functions. This system allows members to check the usages of facilities in the terminal online. User can also use their smart cards to settle the facilities booking payment. The booking system can link-up with MaCaPS Smart Access Control System to provide control and monitoring of facility usage. By adopting this seamless integrated system, the time to manage facilities usage is saved, and the booking facilities can be easily accessed and controlled.
